WASHINGTON, DC 20301-3000

ACQUISITION,  
TECHNOLOGY  
AND LOGISTICS

The Honorable Barbara Boxer  
United States Senate  
Washington, DC. 20510

MAY 30 2003

Dear Senator Boxer:

Mr. Aldridge, Under Secretary of Defense for Acquisition, Technology, and Logistics, in his May 22, 2003, letter to you on concerns you raised regarding the Department of Defense's proposed Readiness and Range Preservation Initiative legislation and perchlorate, stated that the Department of Defense would provide you information we have on perchlorate on our installations. That information is enclosed. We have excluded from the enclosed individual personal information and, for security reasons, data identifying specific munitions, ordnance, or propellant end-item. We are going to be providing similar information to Representative Dingell and Representative Solis in response to their May 16, 2003, letter to Secretary Rumsfeld (enclosed). A similar letter is being sent to Senator Feinstein and Senator Reid.

Very truly yours,

John Paul Woodley, Jr.  
Assistant Deputy Under Secretary of Defense  
(Environment)

W. J. "BILLY" TALZIN, LOUISIANA.  
CHAIRMAN

May 16, 2003

The Honorable Donald H. Rumsfeld  
Secretary  
Department of Defense  
The Pentagon  
Washington, D.C. 20301

Dear Secretary Rumsfeld:

In the spring of 2001, the Department of Defense (DOD) compiled a survey to identify the potential for perchlorate contamination at all active and closed DOD facilities. The survey description stated that "early identification is critical in order to help evaluate potential risks to soils, groundwater, and drinking water." It further stated that "all DOD facilities (active and closed) dating back to 1950 which could have had perchlorate exposure must be identified as quickly as possible."

The U.S. Air Force Research Laboratory, Aerospace Expeditionary Force Technologies Division, Tyndall AFB, Florida was tasked with conducting the perchlorate survey with the assistance of contractor personnel at Applied Research Associates, Incorporated.

Some of the questions that each DOD facility was asked to respond to were:

1. Have you ever sampled for perchlorate in groundwater, soil, sediment, and/or surface water?
2. Have you ever had activities such as open-burn or open-deterioration propellant removal, propellant test and analysis laboratories; ordnance and/or rocket motor testing, or ordnance and/or rocket motor maintenance at your facility?
3. What are your reasons for not sampling for perchlorate?
4. If sampling occurred, has the perchlorate plume been mapped?
5. Are you currently involved in any remediation activities at your facility?

The DOD also indicated that it was contracting separately to get the information listed on an interactive map.

U07475 / 03

The Honorable Donald H. Rumsfeld  
Page 2

More than two years have passed and DOD has not provided this comprehensive information on perchlorate contamination to the Environmental Protection Agency (EPA) officials who requested it nor to the public at large. In fact, we understand that the EPA withheld issuing information requests to DOD under Section 104(e) of the Comprehensive Environmental Response, Compensation and Liability Act in reliance on DOD assurances that it would voluntarily provide comprehensive information on perchlorate contamination.

It appears that the DOD has adopted a policy of covering up and hiding information about the nature and magnitude of the serious perchlorate contamination that exists at its facilities. As a result, the existence of groundwater contamination from perchlorate at DOD facilities is often first discovered after drinking water wells and supplies are already affected. As the drinking water utility associations have recently informed Congress, such a policy of acting only after the damage has been done will incur unnecessary public health risks, unacceptable losses of water sources, and high costs to clean up water supplies and/or secure alternate sources.

Therefore, we request that you provide us with copies of all of the responses that were submitted by DOD facilities to the perchlorate survey that was initiated in the Spring of 2001, and a copy of the interactive map. We would appreciate receiving this material by Friday, June 6, 2003.

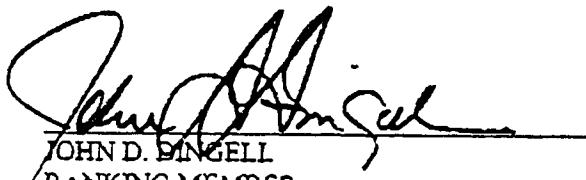

Further, with respect to the 131 DOD facilities that are listed on the Superfund National Priorities List, please indicate which of those facilities used equipment, munitions, or weaponry believed to contain perchlorate, the type of equipment, munitions, or weaponry, whether sampling for perchlorate has occurred, and the results of any such sampling, including the level detected. We would appreciate receiving this information by Friday, June 13, 2003.

Finally, we are concerned that the November 13, 2002, memorandum entitled "Perchlorate Assessment Policy," issued by Assistant Deputy Under Secretary of Defense John Woodley to the Services, is too restrictive to identify contamination of groundwater or surface-water that may be potential sources of drinking water or that may be used for other beneficial uses such as crop irrigation. Before DOD Components can ascertain and assess for perchlorate, that policy appears to require "a pathway on their installations where it could threaten public health." Please state whether this policy would restrict testing and assessment for perchlorate contamination of groundwater that is not currently a source of drinking water but may be a potential source in the future or groundwater that could be used for other beneficial uses such as crop irrigation. We also request any information that has been generated or gathered by DOD installations under the "Perchlorate Assessment Policy." We would also appreciate receiving this information by Friday, June 13, 2003.

The Honorable Donald H. Rumsfeld  
Page 3

If you have any questions about these requests, please contact us or have your staff contact Richard A. Frandsen, Committee on Energy and Commerce Democratic staff, at 202-225-3641 or Heather Taylor of Representative Solis's office at 202-226-9883. Thank you for your attention to this request.

Sincerely,

John D. Dingell

## DoD Perchlorate Occurrence Survey Legend

COLUMN TITLE	EXPLANATION (if necessary)
Date Received	Date the installation inputted the information
Installation Service Agency	
Installation Status	Active / BRAC / NPL / CERCLA / RCRA
City	
State	
Major Command	
Open burn/open det	Has disposal of munitions / ordnance via open burning or open detonation ever occurred on the installation?
Ord &/or rm maint	Has ordnance or rocket motor maintenance ever occurred on the installation?
Ord &/or rm test	Has ordnance or rocket motor testing ever occurred on the installation?
Prop remov	Have propellant removal operations ever occurred on the installation?
Prop Test & alab	Have propellant testing or analytical laboratory operations ever occurred on the installation?
Ground water	Was groundwater on or near the installation sampled for perchlorate?
Soil	Was soil on or near the installation sampled for perchlorate?
Surface water	Was surface water on or near the installation sampled for perchlorate?
Sediment	Was sediment on or near the installation sampled for perchlorate?
Plans for sampling if not already	
When sampling if not already	
If sampled, aware of State and Federal Requirements?	Is the installation aware of any state/federal requirements or requests for response to potential perchlorate contamination?
If sampled, were State and Federal Agencies involved?	Was any sampling coordinated with state/federal agencies?
If sampled, is there a sampling and analysis plan?	
If sampled, was there a plume identified?	
If sampled, was there a plume mapped?	
If remediation activities, is perchlorate addressed?	Is perchlorate being addressed as by any remedial action, regardless of whether perchlorate is the primary contaminant of concern?
Remediation activities	Are any perchlorate-specific remedial actions underway?
If no remediation activities, planning any?	
If no remediation activites, why none planned?
